

# Lakeville Transfer Station Recycling Updates 5/15/10

FYI

We have changed our market facility (the facility where our recycling products are taken) and I have been made aware of a new area to generate some income and also save you the residents a small amount on disposing all of those plastic products that we've told you are not recyclable. We'll call them rigid plastics. Items such as resin lawn chairs, plastic toys, Tupperware items, 5-gallon pails, kitty litter buckets, butter/margarine tubs and yogurt containers, plastic pool items, even kiddie swimming pools all come under this category of rigid plastics. We will have a container next to the colored plastic container and you will be able to recycle these items there. We ask you do not abuse this new venture; it will cause us to discontinue it if things that don't belong are deposited there. PLEASE ask an attendant while you are at the plastic bottle tables if a certain item can be deposited there if you are not sure. We will be generating a small amount of funds from this, but it also saves us money on the bulky waste end (and your pocketbook).

We are always continuing to find new avenues to generate funds, if anyone has suggestions, please bring them to our attention.

Thank you, Brad Bates; Supervisor/recycling coordinator
